

Dear Companies employing Pharma Sales Representatives and CRAs!

We would like to draw your attention that the inpatient units in Hungary are currently being locked down (no visits at all), thus any sales representative or clinical monitoring activities in these departments are also prohibited at the moment. Moreover, for general practitioners, according to the Decree 3 of 2009 (Feb 25) of the Minister/Secretary of Health, article 6, § 5, the sales representative and clinical monitoring activities „shall not impede the service of the health provider and the patient care”. Therefore, considering the situation of the overloaded primary care workers, who are also afflicted by the current epidemic, Pharma Sales Representatives and CRAs should not jeopardize the course of primary care with personal contacts.
